

Timothy Valderrama

Lead Product Designer

valderramadesign@gmail.com · 415.685.3878 · tim-ai-design.com · San Mateo, CA · US Citizen

Lead Product Designer with 9+ years turning complex, regulated workflows into products that grow adoption, revenue, and trust. I lead strategy through delivery and use AI-assisted workflows to speed research, iteration, and prototyping.

Experience

Valderrama Design

Feb 2026 - Present

Principal Product Designer · Freelance

- Professional development, deepening expertise in AI-assisted product design workflows across strategy, interface design, prototyping, and app development.
- Designed and developed an AI-powered preschool activity reporting app for Sunshine Little House of Learning, automating real-time parent updates and end-of-day summaries while returning an estimated 524 hours of staff capacity annually (2 hrs/day × 262 work days).

Medical leave - fully recovered

Sep 2025 - Feb 2026

Meta FinTech

Dec 2024 - Aug 2025

Product Designer V, Staff-level · Consultant

- Led design strategy to reduce checkout payment friction through credential sharing and autopay, using Metamate AI for research synthesis, product framing, and opportunity analysis; increased iRev by 6.3% and boosted credential coverage by 36%.
- Designed solutions to reduce ad billing credit card costs by promoting Monthly Invoicing and optimizing the AI- and automation-driven application flow; lifting conversion from a 39% baseline to 97% and saving ~7.5% annually in credit card fees.

PayPal

Oct 2016 - Apr 2024

Lead Product Designer · FTE

- Modernized PayPal's installment products, a top-priority leadership initiative, by migrating to UI 4.0 and the Checkout Product System; used Figma, ChatGPT, and Claude for research synthesis, UX writing variants, flow critique, and product narrative development, lifting Pay in 4 application completion to 208% of its pre-redesign baseline and driving a 67% increase in Pay in 4 average monthly TPV; application conversion across all six US and UK credit products rose from 51% to 79%.
- Led design strategy and end-to-end implementation across all German installment products, translating complex regulatory, customer, and business requirements into scalable product experiences that drove a 48.78% increase in monthly TPV and 17.33% in annual iRev for Pay in 30 Days, and 14.92% in monthly TPV and 25.44% in annual iRev for PayPal Ratenzahlung.
- Advanced global installment design quality through Figma design systems, AI-assisted competitive pattern analysis, rapid UX copy refinement, structured critique, and data-informed decision-making across markets.
- Mentored senior designers and improved team-wide design maturity by introducing practical AI workflows for research synthesis, divergent ideation, UX writing, critique, stakeholder storytelling, and faster alignment with product and engineering partners.

Cisco Systems

Feb 2015 - Sep 2016

Senior UX Designer · Design Consultant

- Drove end-to-end design for Cisco's premier mobile app, modernizing the experience with updated accessibility and UI standards and delivering a 43% increase in user comprehension.
- Partnered in developing a scalable UI component library and UX standards that standardized and improved Cisco's intranet navigation.
- Served as a UX advisor in the Cisco UE Clinic, delivering twice-weekly design guidance to departments seeking support for their web pages and applications.

Education

Nielsen Norman Group

Master Certificate, Human Computer Interaction, AI assisted design and product strategy for AI experiences

Academy of Art University

Bachelor of Fine Arts, Graphic Design

De La Salle University

Bachelor of Arts and Science, Business Marketing

Skills

Leadership

Product vision, design strategy, platform-scale systems, complex problem framing, decision-making, prioritization, stakeholder influence, executive storytelling, mentorship, and cross-functional leadership.

AI workflow

Research synthesis, opportunity framing, divergent ideation, UX writing, edge-case analysis, rapid prototyping, structured critique, design-to-code exploration, and stakeholder storytelling using ChatGPT, Claude, Figma AI-tools, Google Stitch, and Metamate AI.

UX craft

Figma, mobile and web systems thinking, interaction design, visual design, design systems, component libraries, accessibility, user research, insight synthesis, checkout experiences, FinTech flows, billing systems, credit products, and conversion optimization.
